Pathway 4 — Founder's Challenge

Iyaash Ahmed

Student ID A273864

Technical build, booking flow and measurement

Team: Hammadh · Iyaash · Aiman

WHAT I OWN

- The public website and booking page
- The request form and its API route
- The lead store and protected admin inbox
- GA4 event instrumentation
- The end-to-end deployment test

SHARED STORY

The venture concept

A planned photo and video studio in Malé, serving personal and commercial projects across the Maldives.

Who it serves

Couples planning weddings and elopements; resorts, hospitality teams and smaller brands. Events, portraits and family sessions are secondary.

What it sells

Photo and film together, scoped around one brief, with a written quote before anything is booked.

Why a brief, not a checkout

Crew, schedule and deliverables depend on the project, so the site collects a brief instead of taking instant payment.

SHARED SYSTEM

The customer journey

Four handoffs. Each one has to work, and each one is measurable.

01

Instagram

Audience discovers a post

02

Website

Explores services and work

03

Booking

Sends a project brief

04

Lead inbox

Team follows up

The details a visitor chooses to give us are first-party data, exchanged for a written quote — not collected without a purpose.

SHARED EVIDENCE

Build status and proof still needed

I separate what the source code contains from what the deployed service can prove.

Shown in the supplied source

- Website with four package cards and a booking page
- Form route into a SQLite lead store
- Protected admin inbox with pipeline stages
- GA4 event calls in the code

Proven on the deployed service

- Public URL opens on desktop and mobile
- A dated test request reaches the inbox
- The stage can be changed by the team
- GA4 events visible in DebugView / Realtime

E01

Public website

The live site, opened without any admin login.

INSERT SCREENSHOT

Live URL + date, desktop and phone

E01 · PUBLIC SITE

Owner

Iyaash

Capture exactly

Home page on desktop and mobile, with the URL bar visible.

Check

Domain, date, hero, navigation and the booking call to action.

E02

Packages and Going Big

Three approved starting prices and a fourth custom-quote tier.

INSERT SCREENSHOT

Four cards, prices, Request a custom quote button

E02 · PACKAGES

Owner

Iyaash

Capture exactly

The live packages section showing all four cards.

Check

From MVR 2,500 / 5,500 / 9,500 and Going Big as a custom quote.

E03

Booking request

A clearly labelled test request, submitted like any visitor.

INSERT SCREENSHOT

Form + thank-you page, labelled TEST

E03 · BOOKING

Owner

Iyaash

Capture exactly

The completed form and the confirmation page.

Check

Package preselected, required fields, date, confirmation wording.

E04

Lead inbox and status

The same request inside the protected admin inbox.

INSERT SCREENSHOT

Redact name, email and phone before capturing

E04 · LEAD INBOX

Owner

Iyaash

Capture exactly

The leads list, with contact details redacted.

Check

Matching date and time, stage moved from Booking request to Contacted.

E05

GA4 verification

Measurement checked on the deployed site, not in the code.

INSERT SCREENSHOT

Remove this slide if GA4 is not connected in time

E05 · GA4

Owner

Iyaash

Capture exactly

DebugView during the test journey, plus
Realtime during the class visit.

Check

Property ID, date, and the order `page_view`
→ `form_start` → `generate_lead`.

E06

Active social connection

Aiman owns the content. I verify that the link works end to end.

Post 01 · Studio intro

Post 02 · Weddings

Post 03 · Brands

Story · Book your shoot

INSERT SCREENSHOT — the live @mvcreativeconnect profile and the bio link opening the booking page on a phone

E06 · INSTAGRAM

Owner

Aiman creates the content. I verify the link.

Published

The four creatives above go out today.

Check

Handle, post dates, bio link, and the booking page reachable in two taps.

SHARED SCORECARD

Targets versus actual results

Targets were written before launch. Test activity is counted separately from live activity.

Metric	Target	Actual	Source
Website sessions	_____	_____	GA4 report
Package selections	_____	_____	GA4 event
Form starts	_____	_____	GA4 event
Submitted enquiries	_____	_____	Admin inbox + GA4
Labelled test requests (excluded)	_____	_____	Admin inbox
Instagram reach	_____	_____	Insights
Bio or story link taps	_____	_____	Insights

INDIVIDUAL ANGLE

Technical ownership

Under the visible pages: a form route, a lead store and a protected inbox.

Booking form

Six fields, plus a brief, locations and budget range when a custom quote is chosen.

API route

Validates on the server as well as the browser, rate limits abuse and blocks bot submissions.

Lead store

SQLite. Each request keeps its own status, source, timestamp and private notes.

Admin inbox

Password protected, with roles, CSV export and a JSON backup.

Privacy

Consent recorded with the request. The privacy page names our own database, not an outside CRM.

INDIVIDUAL ANGLE

Deployment test sequence

Four steps, four separate failure points.

- 01 Open the public URL on a second device
- 02 Submit a clearly labelled test request
- 03 Find it in the protected inbox and change its stage
- 04 Confirm the matching GA4 events

TEAM SYNTHESIS

Conclusion

A small, usable journey: discover the offer, send a brief, get a written quote.

What we proposed

A clear photo and film offer for couples and brands, with prices approved in writing.

What I built

A public site, a booking request, a lead store and a protected inbox, instrumented for GA4.

What the evidence shows

_____ verified live elements, with test activity labelled and kept out of the results.

Next priority: _____

TEAM MASTER
